

TEST SCHEDULES

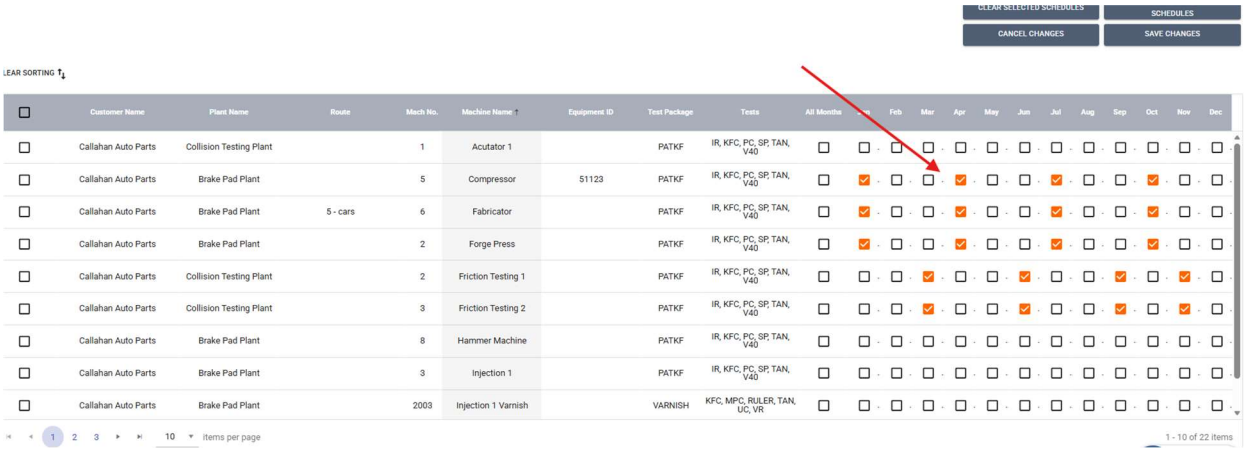

- In Datasight, customers have the ability to set a testing schedule for each individual machine
- To manage the equipment testing schedule, first go to **Program Management**

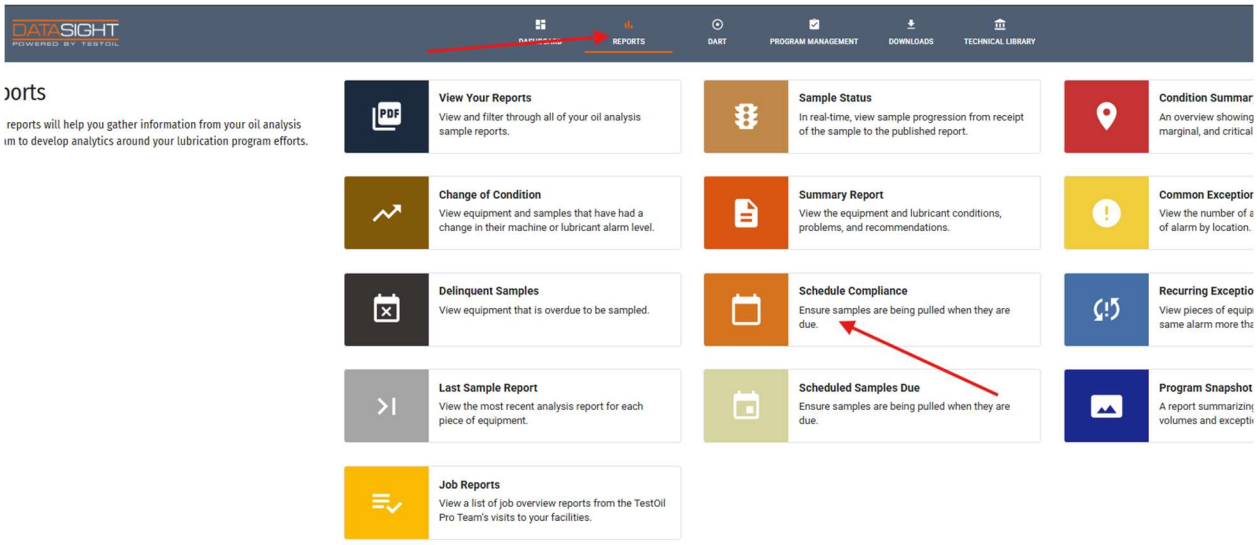

- Next, select **Manage Schedule**

- Select the months that you want a machine to be tested

- Testoil can set up automated supply orders to send bottles and preprinted labels a month prior to scheduled testing. Contact us to activate automated supply orders
- You can review your testing schedule compliance in Datasight by going to **Reports** and then **Schedule Compliance**

- A more detailed compliance report can be provided by our Account Management team. You can request one at testoil.accountmanagement@et.eurofinsus.com
